We are specially trained nail techs with medical backgrounds to help anyone with foot or nail issues.

This nail spa caters to our seniors, a place they can feel comfortable coming into, where there are no fumes from artificial nail services, where husbands and wives can come together, where they are not made to feel uncomfortable about foot or nail issues that other nail salons have no idea how to deal with, where they are taken care of by people who understand that as we age we have problems reaching our feet.

We can handle almost all corn or callus issues. We give education on how to deal with them between visits, what may be the cause of them, what foot care products would work best (if any) and will also refer to local podiatrists if needed.
